The European Community policy in the milk and milk products sector

A PAPAOANNOU

COMMISSION DES COMMUNAUTES EUROPEENNES,
BRUXELLES (BELGIQUE)

ABSTRACT - Milk, a basic element for nutrition is mainly produced in humid temperate areas. The mediterranean countries import the production surplus of industrialized countries. Yet certain mediterranean countries export milk as typical cheeses. Exports to mediterranean countries are essentially as powdered and condensed milk, and in some cases as butter and butteroil. There exists a complementarity between temperate Europe (EEC) and the mediterranean countries.

Key words: dairy products, market.

RESUME - «La politique Communautaire Européenne pour le lait et le secteur des produits laitiers». Le lait, élément indispensable pour l'alimentation est essentiellement produit dans les zones tempérées humides. Les pays méditerranéens importent les excédents produits dans les pays industrialisés. Toutefois, certains pays méditerranéens exportent du lait sous forme de fromages typiques. Les exportations vers les pays méditerranéens sont constituées essentiellement par du lait en poudre et condensé et dans certains cas du beurre et du butteroil. Il existe une complémentarité entre l'Europe tempérée (CEE) et les pays méditerranéens.

Mots-clés: Produits laitiers, marché.

1. Milk and the various processed products that are derived from milk are known to be very important agricultural commodities.

Their presence on the market is an absolute necessity from an economic and social point of view. This bears true both in the so-called South and in the so-called North.

However, milk and milk derived products do tend to be produced in the North. The sector as such is dependent on lots of rain and green pastures; and rain and pastures very often belong to the North. What is in the South? Sun, other agricultural crops and sometimes, fortunately, for those fortunate countries «oil». Some econometricians have, interestingly enough, found a very close relationship between oil earning of the oil producing countries and earning of the milk industry in the EEC. But as a matter of fact mediterranean countries besides some important exceptions are not in general oil producing countries; yet they import large volumes of dairy products.

2. The need for milk imports of mediterranean countries coupled with the surplus of the dairy products in the Northern countries result in practice into considerable trade in various milk products; the main partners here involved being:

— On the import side: Algeria, Egypt, Morocco, Tunisia, Libya in the South Mediterranean basin and Spain, Greece, Italy and Turkey in the North Mediterranean basin whereas Spain, Greece and Italy are all Members of the EEC and

— On the export side: EEC, Nordics (other than Denmark), Switzerland, Austria, Canada, U.S.A., New Zealand and Australia.

3. A good deal of the overall trade volume in milk and dairy products does take place amongst the above mentioned trading partners.

4. Some of the Mediterranean countries present despite their «natural» disadvantages an important production of milk themselves and sometimes they even export milk products.

6. Examining now the actual import needs for dairy products of the various Mediterranean countries the first observation we may make is that for as far as fresh (liquid) milk is concerned —with the exception of the «European» Mediterranean (Italy, Spain and Greece), where dairy plant capacities have to be kept utilized and transport by land from the North of Europe is relatively easier—the rest of the Mediterranean world import of fresh milk is practically zero. One exception Morocco imported in the period 1980-82 an average of 2.200 tonnes from the EEC; more recent figures for this country are not available. However for all other dairy products imported volumes tend to increase.

7. The main dairy products imported by the Mediterranean countries are milk powder and condensed milk. the orders of magnitude can be seen in Appendix II. The two biggest importers of skimmed milk powder are Italy (veal industry plays a part) and Algeria in 1986 while for condensed milk it is Greece (a product historically well

«developed» for domestic consumption) plus Algeria again and also Libya. The EEC provides more than 97 % of SMPT to the Mediterranean countries.

Recently a certain shift has been observed from condensed milk to whole milk powder, mainly in Algeria, indicating some change of philosophy in consuming habits. Some Mediterranean countries may have discovered that they could use their own often high-quality water, mix it with powder and reproduce milk rather than import milk in tins. The drop in the exports of condensed milk has initiated some «painful» plan adjustments in the EEC:

Butter and butteroil is the third important dairy product imported by Mediterranean countries. Very important importers are Italy, Algeria and Egypt.

Finally cheese is mainly imported by Italy and Greece both countries representing a high per capita consumption for this product together with Spain and Egypt in the second place (look table below).

IMPORTS OF CHEESE IN 1986 (Tonnes)

| Country | EEC | EFTA | Switzerl. | USA Canada* | Australia | New Zealand |
|---------|---------|--------|-----------|----------------|-----------|-------------|
| Egypt | 18.200 | 300 | 50 | 1.700 | 0 | 200 |
| Morocco | 350 | 420 | 0 | 0 | 150 | 0 |
| Tunisia | 470 | 80 | 20 | 800 | 55 | 480 |
| Greece | 40.000 | 600 | 150 | 0 | 0 | 2 |
| Italy | 250.000 | 40.500 | 27.200 | 0 | 0 | 1 |
| Spain | 25.300 | 5.000 | 1.500 | 0 | 500 | 300 |
| Turkey | 1.200 | 210 | 0 | 0 | 0 | 0 |
| Cyprus | 750 | 1.200 | 0 | 0 | 0 | 120 |
| Algeria | 3 | 2 | 2 | 1.300* | 4.200 | 1.900 |

* The autor is deeply grateful to Messrs. F. Perez Jimenez and R. Missen of the Milk Division for the statistical work done.

Although this can be legitimate and even economically interesting, the extent to which this has been done in the past and the enormous differences in volumes that it has resulted in, does raise a question of economical and political nature.

Dairy products trade is, to an important extent, regulated by the international Dairy Arrangement in Geneva and in operation since 1981; apart from the Mediterranean countries which are EEC members, only Egypt is a member of this Arrangement and even they are very often absent.

Conclusion

Community and its mediterranean partners could do better in the future in terms of cooperation and market stability.
